Leonidas Vellopoulos, MD

Dear Dr. Frederik Shroyens,

On behalf of the Hellenic Homeopathic Medical Society, we would like to express our sincere recognition and gratitude for your invaluable contribution to the international homeopathic community.

You have contributed on multiple levels to homeopathy through your lifelong dedication—not only to the repertory, as the creator and author of *Synthesis*, but also in research and education. Building a repertory is no easy task. It requires rigorous work, not only in collecting and validating information from numerous sources, including voluminous homeopathic books spanning more than 200 years, but also in structuring the repertory to make it practical and user-friendly. You have made significant contributions in both aspects.

We, as a scientific society, strongly appreciate and acknowledge your work and intellectual efforts, especially on *Synthesis*, and we wish to reassure you that the Greek homeopathic medical community stands by you.

Please accept our warmest appreciation for your lifelong dedication to the advancement of homeopathy, and our full solidarity during these challenging times.

With respect and collegial regards,

The President

Demosthenes Papamethodiou

The Secretary

Spyridon Kyvellos
