

December 3<sup>rd</sup>, 2025

**To Whom It May Concern,**

My name is Tomer Harel and I manage one of the largest homeopathy schools in Israel.

As a student I was required to choose a homeopathic software program. Most of my teachers were using a software called **MacRepertory** and **ReferenceWorks**, developed by the software company **KHA**.

Nevertheless, I explored other software programs available on the market. The most prominent among them was a Belgian program called **RADAR**, developed by the software company **Archibel S.A**.

What drew my attention to the RADAR software was the detailed and reliable information contained in its main reference book (known in homeopathic terminology as a *repertory*). The name of that book is **Synthesis Repertory**.

Based on my clinical experience, I noticed that the clinical condition of my patients corresponded more closely to the results derived from the **Synthesis Repertory**.

Consequently, I purchased a **hard copy** of the Synthesis Repertory and began following the work of its author, **Dr. Frederik Schroyens**.

I regularly followed the new rubrics he chose to include in the updated editions, the new remedies that were added, and, most notably, the scientific debates that took place over the years between **Dr. Schroyens** and the authors of other repertories

Whenever certain issues were unclear to me, I would consult internationally recognized teachers such as **Jeremy Sherr** and **Massimo Mangialavori**, and others — from whom I learned that the meticulousness and research efforts of **Dr. Schroyens** ensured that the information presented in his repertory was reliable, precise, and of great professional value.

As fate would have it, in later years I began serving as the local representative in Israel for the software program I had been using (KHA).

During the years **2011–2012**, I was deeply saddened to learn that **David Warkentin**, the creator of the **MacRepertory** and **ReferenceWorks** software, had been diagnosed with terminal cancer.

**Dr. Rajan Sankaran**, a leading international homeopath from India approached me with a request to act as his representative in the acquisition of the software company from David's heirs.

Consequently, I proceeded with the acquisition of **KHA** on behalf of **Dr. Rajan Sankaran**, and thereafter assumed the roles of **Chief Executive Officer** and **Chairman of the company**.

Between **2012 and 2018**, I managed the company's operations, changing its name from **KHA** to **Synergy Software**.

Throughout my tenure as CEO of **Synergy Software**, I always hoped that one day we would be able to collaborate with Zeus.

This opportunity arose at the beginning of **2017**.

A **homeopathic summit meeting** indeed took place in Munich and resulted in the decision that the two companies would jointly hold a major seminar in **Bruges**, delivered by some of the most renowned and respected teachers in the field worldwide.

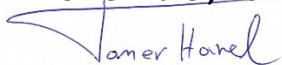

**Dr. Schroyens** made an enormous contribution to the success of the Bruges seminar and the collaboration, thanks to his wisdom, generosity, attentiveness, and openness to all the points that were important to us. His ability to set aside personal ego enabled us to successfully overcome the natural disagreements that arose between the two sides.

At the end of that year, I decided to step down from my role as CEO of **Synergy Software** and return to my previous work as a teacher and practicing homeopath in my clinics.

I can state, based on my personal familiarity with the companies and the individuals who created the books and software that have had the greatest impact on modern homeopathy, that **Dr. Schroyens** occupies a central place in these works, which have benefited thousands of practitioners.

Most notably, he holds a distinguished place in the history of homeopathy as the creator and author of Synthesis, one of the most important, reliable, and influential homeopathic repertories ever produced.

With great respect,  
**Tomer Harel, RCHom**
