I feel that Dr. Frederik Schroyens has dedicated his services solely to the development of the Synthesis repertory and has created a large team of collaborators all over the world to verify the genuinity of the work.

This repertory has been very close to my heart and I have been one of the collaborators for the last many years.

I sincerely appreciate his dedication and hard work that goes along with the publication of this repertory.

After Kent repertory, this is the best repertory one can ever get and I sincerely thank Frederik Schroyens for working on this repertory and making it one of the most useful tools in everyone's practice.

Dr. Farokh J. Master
