Subject: Statement about Synthesis

Statement by Peter Tumminello

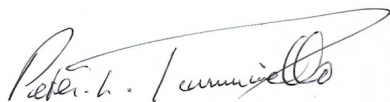

regarding Dr. Frederik Schroyens

The work of Dr Schroyens has been familiar to me for most of my forty years of homeopathic practice here in Sydney, Australia. He has also been a valued colleague for the past twenty years.

His undertaking in compiling, developing and authoring the Synthesis Repertory first as a computerized repertory on the Radar platform (thirteen versions) and then as printed version has been a pillar of practice throughout the homeopathic world. His personal effort to create this development and synthesis of ideas, methodologies and information in the profession is unique and has few peers.

I am surprised and deeply disappointed that he has been excluded from 'Zeus' that now oversees the future of his work. I yearn to see sensible justice in this matter.

Yours Sincerely

Peter Tumminello
